

HSJ Information

No one understands the NHS better

Database of Hospital Doctors

Hospital doctors work within many specialist and clinical therapy areas and may also be involved in teaching and carrying out research, as well as day-to-day administrative duties such as keeping patient records and writing reports.

Hospital doctors are increasingly undertaking managerial responsibilities in hospitals, getting involved in auditing and attending committee meetings.

We can help you to communicate and influence clinicians throughout the UK and Ireland.

Make your next campaign a success with our regularly verified data. We have a specialist team of product researchers on hand to provide you with quality, GDPR compliant data.

Database Contents: 79,197

Grades:

- Associate Specialist
- Clinical Assistant
- Consultant
- Dental Officer
- Professor
- Specialist Registrar
- Staff Grade

Responsibility/Role	Count
Hospital Doctors	75,214

For the most up-to-date counts or to speak to us about our Campaign Packages, please contact your account manager direct or use the contact us form on this site.

Please note: It is common for a healthcare professional to have more than one responsibility. Therefore, there may be fewer named individuals on the database than there are areas of responsibility indicated above. Counts provided will be deduped to provide 'unique' contacts. Number of contacts may vary during our research cycle due to the fast-paced rate of change of organisations changes within UK healthcare. Counts correct at time of publishing December 2025.
