

HSJ Information

No one understands the NHS better

Database of Healthcare in Ireland

Healthcare in Ireland is based on a public health care model funded by general taxation, provided by the Health Service Executive, the system is split into primary and secondary care components.

Working with administrators, providers, financial managers and marketing specialists, managers must be prepared to navigate competing demands and priorities within their organisation.

Our Database of Healthcare Management in Ireland contains key stakeholders and decision makers within selected management roles.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Job Responsibility
- Organisation Type

For the most up-to-date counts or to speak to us about our Campaign Packages, please contact your account manager direct or use the contact us form on this site.

Please note: It is common for a healthcare professional to have more than one responsibility. Therefore, there may be fewer named individuals on the database than there are areas of responsibility indicated above. Counts provided will be deduped to provide 'unique' contacts. Number of contacts may vary during our research cycle due to the fast-paced rate of change of organisations changes within UK healthcare. Counts correct at time of publishing June 2026.
