

# HSJ Information

No one understands the NHS better

## Database of NHS Management

The NHS provides an enormous range of services to millions of people across the country. Without skilled and dedicated managers to lead and run it, it would not be able to do what it is here to do, treat and care for patients.

NHS Managers play a key role in ensuring that services are delivered by making sure clinicians have what they need to care for patients. This can include securing the right buildings, facilities, equipment, information and support staff to get the job done as safely and efficient as possible.

All information within the database is regularly verified and updated by our specialist team of product researchers, giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Clinical Services
- Job Responsibility
- Organisation Type
- Services Offered by Trust
- ICB/Integrated Care System

Additional Fields Available:

- Organisational Data Service Code (ODS)
- Provider Collaborative Links

Database Contents: **54,090**

Responsibility/Role	Count

For the most up-to-date counts or to speak to us about our Campaign Packages, please contact your account manager direct or use the contact us form on this site.

**Please note:** It is common for a healthcare professional to have more than one responsibility. Therefore, there may be fewer named individuals on the database than there are areas of responsibility indicated above. Counts provided will be deduped to provide 'unique' contacts. Number of contacts may vary during our research cycle due to the fast-paced rate of change of organisations changes within UK healthcare. Counts correct at time of publishing June 2026.
